

#### **S4 GEOGRAPHY HOLIDAY PACKAGE**

1. **Which map projection is shaped like a cone and is good for mapping mid-latitude regions?**
  - A) Cylindrical
  - B) Conical
  - C) Azimuthal
  - D) Orthographic
2. **Which of the following is the highest mountain in Rwanda?**
  - A) Mount Muhabura
  - B) Mount Bisoke
  - C) Mount Karisimbi
  - D) Mount Sabyinyo
2. **What type of relief feature is the Congo-Nile divide?**
  - A) Valley
  - B) Plateau
  - C) Mountain range
  - D) Ridge
3. **How was the Virunga Mountain range formed?**
  - A) By erosion
  - B) By folding
  - C) By volcanic activity
  - D) By glacial movement
4. **Which relief region of Rwanda is known for its gently rolling hills?**
  - A) Congo-Nile Ridge
  - B) Eastern Lowlands
  - C) Central Plateau
  - D) Volcanic Highlands
5. **The Eastern Lowlands of Rwanda were mainly formed by:**
  - A) Volcanic eruptions
  - B) Erosion
  - C) Faulting
  - D) Sedimentation and weathering
6. **Which of the following best describes the relief of Rwanda?**
  - A) Mainly flat lowlands
  - B) Entirely mountainous
  - C) A mix of highlands, plateaus, and lowlands
  - D) Only volcanic mountains
7. **The steep slopes and escarpments in Western Rwanda are mainly caused by:**

- A) Erosion
  - B) Tectonic faulting
  - C) Volcanic lava flow
  - D) Human activities
8. **Mountains in the North-West of Rwanda belong to which mountain range?**
- A) Rwenzori
  - B) Virunga
  - C) Drakensberg
  - D) Atlas
9. **Which process is responsible for forming the rift valley near Lake Kivu?**
- A) Deposition
  - B) Folding
  - C) Faulting
  - D) Erosion
10. **Lake Kivu lies within which type of geological structure?**
- A) Basin
  - B) Rift valley
  - C) Volcanic crater
  - D) Alluvial plain
11. **The Central Plateau in Rwanda is mainly made up of:**
- A) Lava plains
  - B) Fold mountains
  - C) Granite rocks and weathered hills
  - D) Swampy lowlands
12. **Which of the following landforms in Rwanda is volcanic in origin?**
- A) Akagera valley
  - B) Lake Muhazi
  - C) Mount Bisoke
  - D) Buberuka Highlands
13. **What type of rock mostly forms the Virunga Mountains?**
- A) Sedimentary rock
  - B) Metamorphic rock
  - C) Volcanic (igneous) rock
  - D) Limestone
14. **Which relief region of Rwanda has the lowest elevation?**
- A) Buberuka Highlands
  - B) Congo-Nile Ridge

- C) Eastern Lowlands
- D) Central Plateau
